Subject: unauthorized fill in what appears to be a wetlands adjacent to Kalispel Creek

Summary of conversation:

I asked Mike who place the fill in what appeared to be a wetland. He stated Sackett was placing the fill. I asked the reason the fill was being placed in that location, he stated it was just a place to dump unwanted material.

Mr Sudnikovich stated he had someone from the Seattle area who is in construction business looked at the parcel and the individual told him it was just a meadow. The parcel appeared to have been cleared of vegetation and may have had fill placed prior to this. The parcel is identified as PSS1C on the NWI. I asked if a wetland delineation report was available, he stated no report was written. He does not believe the area is a wetland unless we can prove it to him. He is not willing to hire a wetland delineator.

I informed him a permit is required to place fill in wetlands, he stated Mike Sackett has the permits.
